

VIRTUAL MYSHOP TRAINING HAS ARRIVED!

We are pleased to now be offering online virtual MyShops for all of our ACDelco Professional Service Centres! This format is interactive and informative as only one shop will be presented to at a time. Just like our MyShop program, these sessions are one hour per course and will take place at your shop, all you need is a computer, cell phone, and a decent internet connection! After you choose one of the courses being offered, our professional instructors will take you through a presentation that includes operation and diagnoses principles, and of course answer any questions you may have.

Current Courses available

Fuel Pump Replacement

This 1-hour virtual MyShop will cover important tips and procedures for replacing a fuel pump/module to prevent come backs. We will discuss improper fuel pump system diagnosis and/or installation procedures that lead to premature fuel pump/module replacement. Topics include: fuel tank inspection, importance of a clean tank, installation tips and electrical power supply issues such as the fuel pump relay having high resistance, high resistance in the power feed wire to the pump, high resistance (voltage drop) on the ground circuit and faulty fuel pump pigtail.

Advanced Variable Valve Timing

This 1-hour virtual MyShop will familiarize technicians with some of the latest engine technologies found on today's vehicles. Some of the topics include: Variable Valve Timing (VVT), Spline Phaser system, Vane Phaser Overhead Cam (OHC) system and the Vane Phaser Overhead Cam (OHC) magnetically controlled system. This virtual My Shop will cover the operation and unique service procedures related to each system with an emphasis on diagnostics.

FILLING FAST! Don't delay to get your shop in on this great tool. Time slots are First come - 1st Served.

We have 1 hour slots from Sept 21 - Sept 28

Schedule through your Territory Manager or email
